

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier	
Product name	: Hardtop Pro Comp B
Product code	: 27221
Product description	: Paint.
Product type	: Liquid.
Other means of identification	: Not available.

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use in coatings - Professional use

#### 1.3 Details of the supplier of the safety data sheet

Jotun Paints (Europe) Ltd. Stather Road Flixborough, Scunthorpe North Lincolnshire DN15 8RR England

Tel: +44 17 24 40 00 00 Fax: +44 17 24 40 01 00 SDSJotun@jotun.com

#### 1.4 Emergency telephone number

Contact NHS Direct; phone 0845 4647 or 111. Open 24/7.

## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture

Product definition : Mixture

## Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

2

5

Flam. Liq. 3, H226 Eye Dam. 1, H318

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 11 for more detailed information on health effects and symptoms.

# 2.2 Label elements

Hazard pictograms

Signal word Hazard statements Danger. H226 - Flammable liquid and vapour. H318 - Causes serious eye damage.

**Precautionary statements** 

Date of issue/Date of revision

: 27.01.2020 Date of previous issue

: 22.01.2020

SECTION 2: Hazards	Jentification	
General	Not applicable.	
Prevention	P280 - Wear eye or face protection. P210 - Keep away from heat, hot surfaces, sparks, open flames and other ign sources. No smoking.	ition
Response	P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for sev minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician.	veral
Storage	P403 - Store in a well-ventilated place. P235 - Keep cool.	
Disposal	P501 - Dispose of contents and container in accordance with all local, regiona national and international regulations.	al,
Hazardous ingredients	silane, trimethyoxy[3-(oxiranyl-methoxy)propyl]-	
Supplemental label elements	Not applicable.	
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	Not applicable.	
Special packaging requirem	<u>its</u>	
Containers to be fitted with child-resistant fastenings	Not applicable.	
Tactile warning of danger	Not applicable.	
2.2 Other hererde		

#### 2.3 Other hazards

Other hazards which do : None known. not result in classification

## **SECTION 3: Composition/information on ingredients**

3.2 Mixtures : Mixture				
Product/ingredient name	Identifiers	Weight %	Regulation (EC) No. 1272/2008 [CLP]	Туре
silane, trimethyoxy[3-(oxiranyl- methoxy)propyl]-	EC: 219-784-2 CAS: 2530-83-8	≥10 - ≤25	Eye Dam. 1, H318	[1]
n-butyl acetate	REACH #: 01-2119485493-29 EC: 204-658-1 CAS: 123-86-4	≤10	Flam. Liq. 3, H226 STOT SE 3, H336 EUH066	[1] [2]
			See Section 16 for the full text of the H statements declared above.	

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

Date of issue/Date of revision

: 27.01.2020 Date of previous issue

: 22.01.2020

## **SECTION 4: First aid measures**

4.1 Description of first aid me	ures	
General	In all cases of doubt, or when symptoms persist, seek medical attention. Never anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice.	•
Eye contact	Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.	
Inhalation	Remove to fresh air. Keep person warm and at rest. If not breathing, if breathin irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.	
Skin contact	Remove contaminated clothing and shoes. Wash skin thoroughly with soap an water or use recognised skin cleanser. Do NOT use solvents or thinners.	d
Ingestion	If swallowed, seek medical advice immediately and show the container or label Keep person warm and at rest. Do NOT induce vomiting.	
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. is suspected that fumes are still present, the rescuer should wear an appropria mask or self-contained breathing apparatus. It may be dangerous to the perso providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothir thoroughly with water before removing it, or wear gloves.	te n

#### 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. Ingestion may cause nausea, diarrhea and vomiting.

#### Over-exposure signs/symptoms

Eye contact	: Adverse symptoms may include the following: pain watering redness
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: pain or irritation redness blistering may occur
Ingestion	: Adverse symptoms may include the following: stomach pains
4.3 Indication of any imp	nediate medical attention and special treatment needed
Notes to physician	<ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.</li> </ul>
Specific treatments	: No specific treatment.

See toxicological information (Section 11)

## **SECTION 5: Firefighting measures**

5.1 Extinguishing media		
Suitable extinguishing media	ecommended: alcohol-resistant foam, CO₂, powders, water spray.	
Unsuitable extinguishing media	o not use water jet.	
5.2 Special hazards arising fr	ne substance or mixture	
Hazards from the substance or mixture	re will produce dense black smoke. Exposure to decomposition products nause a health hazard.	nay
Hazardous combustion products	ecomposition products may include the following materials: carbon monoxi arbon dioxide, smoke, oxides of nitrogen.	ide,
5.3 Advice for firefighters		
Special protective actions for fire-fighters	ool closed containers exposed to fire with water. Do not release runoff fron ains or watercourses.	n fire to
Special protective equipment for fire-fighters	opropriate breathing apparatus may be required.	

## **SECTION 6: Accidental release measures**

6.1 Personal precautions, pre	tive equipment and emergency procedures	
For non-emergency personnel	Exclude sources of ignition and ventilate the area. Avoid breathin Refer to protective measures listed in sections 7 and 8.	g vapour or mist.
For emergency responders	If specialised clothing is required to deal with the spillage, take no information in Section 8 on suitable and unsuitable materials. Se information in "For non-emergency personnel".	
6.2 Environmental precautions	Do not allow to enter drains or watercourses. If the product contarivers, or sewers, inform the appropriate authorities in accordanc regulations.	
6.3 Methods and material for containment and cleaning up	Contain and collect spillage with non-combustible, absorbent ma earth, vermiculite or diatomaceous earth and place in container f according to local regulations (see Section 13). Preferably clean Avoid using solvents.	or disposal
6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective See Section 13 for additional waste treatment information.	equipment.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 7.1 Precautions for safe handling

Prevent the creation of flammable or explosive concentrations of vapours in air and avoid vapour concentrations higher than the occupational exposure limits.

In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard.

Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. Operators should wear antistatic footwear and clothing and floors should be of the conducting type.

Keep away from heat, sparks and flame. No sparking tools should be used.

Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Avoid inhalation of dust from sanding.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.

Date of issue/Date of revision	: 27.01.2020	Date of previous issue	: 22.01.2020	Version	: 1.01	4/12

## **SECTION 7: Handling and storage**

Put on appropriate personal protective equipment (see Section 8).

Never use pressure to empty. Container is not a pressure vessel.

Always keep in containers made from the same material as the original one.

Comply with the health and safety at work laws.

#### Do not allow to enter drains or watercourses. Information on fire and explosion protection

Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air.

When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikely to be sufficient to control particulates and solvent vapour in all cases. In such circumstances they should wear a compressed air-fed respirator during the spraying process and until such time as the particulates and solvent vapour concentration has fallen below the exposure limits.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

#### Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

#### Additional information on storage conditions

Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

### 7.3 Specific end use(s)

Recommendations	: Not available.
Industrial sector specific solutions	: Not available.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### 8.1 Control parameters

#### **Occupational exposure limits**

Product/ingredient name	Exposure limit values
n-butyl acetate	EH40/2005 WELs (United Kingdom (UK), 8/2018). STEL: 966 mg/m <sup>3</sup> 15 minutes. STEL: 200 ppm 15 minutes. TWA: 724 mg/m <sup>3</sup> 8 hours. TWA: 150 ppm 8 hours.
- · ·	duct contains ingredients with exposure limits, personal, workplace

procedures atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

Date of issue/Date of revision

## **SECTION 8: Exposure controls/personal protection**

Product/ingredient name	Exposure	Value	Population	Effects
n-butyl acetate	Short term Inhalation	960 mg/m <sup>3</sup>	Workers	Systemic
	Short term Inhalation	960 mg/m <sup>3</sup>	Workers	Local
	Long term	480 mg/m <sup>3</sup>	Workers	Systemic
	Long term	480 mg/m <sup>3</sup>	Workers	Local
	Short term Inhalation	859.7 mg/ m³	Consumers	Systemic
	Short term Inhalation	859.7 mg/ m <sup>3</sup>	Consumers	Local
	Long term Inhalation	102.34 mg/ m <sup>3</sup>	Consumers	Systemic
	Long term Inhalation	102.34 mg/ m <sup>3</sup>	Consumers	Local

#### **PNECs**

Product/ingredient name	Compartment Detail	Value	Method Detail
n-butyl acetate	Fresh water Marine Sewage Treatment Plant Fresh water sediment Marine water sediment Soil	0.18 mg/l 0.018 mg/l 35.6 mg/l 0.981 mg/kg dwt 0.0981 mg/kg dwt 0.0903 mg/kg dwt	

### 8.2 Exposure controls

Appropriate engineering controls : Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn.

## Individual protection measures

Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying to EN 166 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead.
Skin protection	
Gloves	<ul> <li>There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals. The breakthrough time must be greater than the end use time of the product. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Gloves should be replaced regularly and if there is any sign of damage to the glove material.</li> <li>Always ensure that gloves are free from defects and that they are stored and used correctly.</li> <li>The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.</li> <li>Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.</li> </ul>
Date of issue/Date of revision	: 27.01.2020 Date of previous issue : 22.01.2020 Version : 1.01 6/12

## **SECTION 8: Exposure controls/personal protection**

	Wear suitable gloves tested to EN374. Recommended, gloves(breakthrough time) > 8 hours: Teflon, polyvinyl alcohol (PVA) May be used, gloves(breakthrough time) 4 - 8 hours: 4H, butyl rubber, PVC Not recommended, gloves(breakthrough time) < 1 hour: nitrile rubber, neoprene, Viton®, PE
	For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves.
	The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.
Body protection	<ul> <li>Personnel should wear antistatic clothing made of natural fibres or of high- temperature-resistant synthetic fibres.</li> </ul>
Other skin protection	<ul> <li>Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
Respiratory protection	: If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. Use respiratory mask with charcoal and dust filter when spraying this product, according to EN 14387(as filter combination A2-P2). In confined spaces, use compressed-air or fresh-air respiratory equipment. When use of roller or brush, consider use of charcoalfilter.
Environmental exposure controls	: Do not allow to enter drains or watercourses.

## **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties **Appearance Physical state** : Liquid. Colour : Various Odour : Characteristic. **Odour threshold** : Not applicable. рΗ : Not applicable. Melting point/freezing point : Not applicable. Initial boiling point and : Lowest known value: 126°C (258.8°F) (n-butyl acetate). boiling range : Closed cup: 28°C Flash point **Evaporation rate** : 1 (n-butyl acetate) compared with butyl acetate Flammability (solid, gas) : Not applicable. Upper/lower flammability or : 0.43 - 7.6% explosive limits : Highest known value: 1.5 kPa (11.3 mm Hg) (at 20°C) (n-butyl acetate). Vapour pressure Weighted average: 0.46 kPa (3.45 mm Hg) (at 20°C) : Highest known value: 4 (Air = 1) (n-butyl acetate). Vapour density : 1.21 g/cm<sup>3</sup> Density Solubility(ies) : Insoluble in the following materials: hot water. Partition coefficient: n-octanol/ : Not available. water Auto-ignition temperature : Lowest known value: 400°C (752°F) (silane, trimethyoxy[3-(oxiranyl-methoxy) propyl]-). **Decomposition temperature** : Not available. : Kinematic (40°C): >0.205 cm<sup>2</sup>/s (>20.5 mm<sup>2</sup>/s) Viscosity **Explosive properties** Not available. 5 : Not available. **Oxidising properties** Date of issue/Date of revision : 27.01.2020 Date of previous issue : 22 01 2020 Version :101 7/12

## **SECTION 9: Physical and chemical properties**

## 9.2 Other information

No additional information.

## **SECTION 10: Stability and reactivity**

	-	-
10.1 Reactivity	:	No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	:	Stable under recommended storage and handling conditions (see Section 7).
10.3 Possibility of hazardous reactions	1	Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	:	When exposed to high temperatures may produce hazardous decomposition products.
10.5 Incompatible materials	:	Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.
10.6 Hazardous decomposition products	:	Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

In contact with water, the product hydrolyses; during curing, releases Methanol. If the product is contaminated with water during production, transportation or storage, this may effect both flashpoint and hazard potential.

## **SECTION 11: Toxicological information**

### **11.1 Information on toxicological effects**

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. Ingestion may cause nausea, diarrhea and vomiting.

#### Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
	LC50 Inhalation Vapour	Rat	>21.1 mg/l	4 hours
	LD50 Dermal	Rabbit	>17600 mg/kg	-
	LD50 Oral	Rat	13100 mg/kg	-

### Acute toxicity estimates

None.

### Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
silane, trimethyoxy[3- (oxiranyl-methoxy)propyl]-	Eyes - Irritant	Mammal - species unspecified	-	-	-

#### Sensitisation

Based on available data, the classification criteria are not met.

### Mutagenicity

No known significant effects or critical hazards.

### **Carcinogenicity**

**Fertility effects** 

No known significant effects or critical hazards.

## Reproductive toxicity

- Developmental effects
- : No known significant effects or critical hazards.
- : No known significant effects or critical hazards.

#### Specific target organ toxicity (single exposure)

Date of issue/Date of revision : 27.01.2020		: 22.01.2020	Version : 1.01	8/12
